RFP for Housing-Focused Outreach for Individuals who are Unhoused

December 30, 2025

1. **Our organization is an IT service company with experience in developing mobile applications. Will Allegheny County consider developing a web/mobile application as a tool for outreach to provide digital access to information about available shelters and housing, along with other available resources, such as information about non-profit organizations, food pantries, job openings, etc.?**

   No.

2. **Is there a preference for vendors based in Allegheny County? Considering our organization intends to provide IT services, we can work remotely to assist Allegheny County with its initiative to reach out to the vulnerable and homeless people.**

   No, the Successful Proposer(s) does not need to be based in Allegheny County. We are interested in Proposers who can clearly demonstrate that they can successfully provide housing-focused and related outreach services for people experiencing homelessness in the County, as outlined in the RFP.
